## **Senior Cost Estimator**

The ideal candidate will have a solid background in commercial construction, quantity surveying, construction management/engineering or architecture and civil engineering with the following:

- 10 or more years estimating, or project management experience on large scale building projects
- A College degree mandatory and in a construction related field preferred
- Demonstrated client management, communication, and organization skills
- Attention to detail and quality of work
- Ability to think strategically, plan, and problem solve
- Intermediate to advanced knowledge of Microsoft Word, Outlook, Microsoft Project and Excel
- Desire for career growth
- Ability to learn new software skills

Responsibilities of this position include:

- Perform cost and risk management consulting services
- Prepare cost reports
- Perform quantity take-offs
- Analyze and negotiate claims and change orders
- Analyze design proposals and propose alternatives
- Participate in value engineering efforts
- Manage projects and other estimators team members from feasibility to close out
- Build and maintain client relationships
- Assist in recruitment of future staff
- Participate in continuous professional development program.

We offer a competitive salary. The firm strongly believes in providing opportunities for both personal and professional growth.
